

3C Technology Leased Lines

DISCOVER:

BUSINESS-CLASS CONNECTIVITY WITH GUARANTEED SPEEDS OF UP TO 1Gbps

Dedicated internet access with guaranteed speeds and service levels

If your business relies on the strength of its data connection, 3C Technology have a range of Leased Line solutions which offer dedicated internet access with guaranteed speed and service levels.

Delivered over fibre to the cabinet (EoFTTC), Ethernet First Mile (EFM) or Ethernet over Fibre, we can offer the ideal solution for your business. These offer the extra reliability, security and symmetrical download and upload speeds that make Leased Lines ideal for large data transfers, video conferencing, smooth and seamless VoIP calls, and access to cloud-based services.

3C Technology offer wide coverage and competitive pricing. Unlike many other suppliers, we also use multiple carriers (BT, Virgin, TalkTalk, Colt, Vodafone).

Leased Line Advantages

A leased line is a permanent, dedicated high performance telecommunications network connection which can carry voice, data and Internet traffic via a copper or fibre optic connection.

A leased line is inherently secure in its own right because it operates as a point to point service. However, if a connection is provided to the Internet additional security services will need to be implemented, such as a firewall. 3C Technology provides a full range of managed security products, more details can be found by contacting us [via our website](#) or calling us on the number below.

Leased lines have many advantages compared to standard ADSL connections:

- **Leased Lines are Available at Higher Speeds**
- **No Slow-Down at Peak Times**
- **Faster Uploads**
- **More Reliable**
- **Business-Class Support**

Below is an overview of the three types of Leased Line services we can offer:

1. Ethernet Over FTTC Leased Lines

EoFTTC uses the reach of fibre broadband to deliver an SLA-backed, business-assured service. As an entry-level leased line solution, it provides a guaranteed symmetrical speed of up to 19Mb.

- Guaranteed Speeds
- Up to 19 Mbps Download Speed
- Up to 19 Mbps Upload Speed
- Unlimited Download Limit
- UK-based support and customer service
- Free Static IP

2. Ethernet First Mile (EFM) Leased Lines

EFM connections achieve symmetrical speeds of up to 35Mb using existing copper lines. EFM provides businesses with a resilient, cost-effective alternative to Fibre Ethernet lines with the added benefit of installation creating minimal disruption.

- Guaranteed Speeds
- Up to 35 Mbps Download Speed
- Up to 35 Mbps Upload Speed
- Unlimited Download Limit
- UK-based support and customer service
- Free Static IP

3. Fibre Carrier Ethernet Leased Lines

Fibre Ethernet connections offer the fastest symmetrical speeds and highest reliability of all leased lines. Delivered over a dedicated fibre optic bearer, it's completely uncontended, highly secure and flexible enough to rapidly increase bandwidth when needed.

- Guaranteed Speeds
- Up to 1Gbps Download Speed
- Up to 1Gbps Upload Speed
- Unlimited Download Limit
- UK-based support and customer service
- Free Static IP
